

TT98G

Modular conveyor oven

TT98G, the gas modular conveyor oven, is composed of one or more **stackable baking chambers** and an optional stand. During baking, the product is placed on the conveyor belt and passes through two flows of hot air: **impingement technology**, the best system for heat distribution in the whole baking chamber for **perfect baking** of **pizza**, **pastry**, **bakery**, and **gastronomy**. Efficiently insulated and isolated, the external surfaces are cool even during use. The baking chamber maximum temperature is 320°C (608°F).

OPERATION

- Heating by means of two blowing burners with premixing function of air and gas
- Electronically modulated control of two burners flames that allows the automatic energy control on the strength of the quantity of the baked product and the position located inside the baking chamber ADAPTIVE-GAS® TECHNOLOGY
- Independent regulation and control both the input side and the output side of the baked product with continuous temperatures survey with 2 high sensitive thermocouples DUAL-TEMP® TECHNOLOGY
- Air blowing system using 2 stainless steel fans independently motorized
- Conveyor belt with speed adjustable from 2 to 20 minutes and feed-back control at the option of belt standstill
- Programmable electronic function management ECO-SMARTBAKING[®]
- Different baking heating regulations between upper and lower part of the product DUAL FLOW® TECHNOLOGY
- Maximum temperature reached 320°C (608°F)
- Independent system for additional forced air cooling of the components with low noise

CONSTRUCTION

- Structure in folded stainless steel sheets
- Stainless steel door hinged on left hand side with logo BlackBar® Design
- Stainless steel access flap hinged at bottom
- Tempered glass window
- Low-cluttered handle
- Extractable stainless steel conveyor belt, with continuous tensioning
- Electronic control panel on front left side
- Double Peephole for checking the burner status
- · Baking chamber in stainless steel sheets
- Top and bottom blowers in welded stainless steel sheets, extractable for cleaning
- Double Low-emission (NOx, CO) stainless steel burner
- Double Combustion chamber entirely built with special high-temperatures stainless steel
- \bullet Rock wool heat insulation, thermal joints and air space COOL AROUND $^{\textcircled{B}}$ Technology

ACCESSORIES

- Stand with castors, height 153, 600mm complete with pocket for screens
- Hood for vapour extraction
- Thick mesh for direct baking of low-moisture doughs or for grilling vegetables

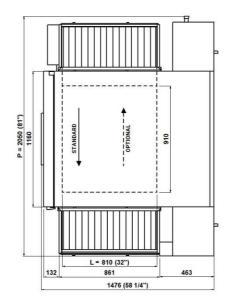

BAKING DIMENSIONS

810mm
910mm
2050mm
2475mm
0,74m ²

STANDARD EQUIPMENT

- Color multilanguage display TFT 5"
- 100 customisable programs
- ECO-STAND BY[™] TECHNOLOGY Saving device with the possibility to stop the belt for break
- Discontinuous baking cycle STEP
- Start-Stop function to move tape to the set point is reached
- LOCK function
- Customized Hotkey with recurring control
- Auto test with display of error message
- · USB imput and wifi module for sw update
- Double independent maximum temperature and minimum blow pressure safety devices
- Stainless steel resting support
